INDEX

ACETYLCHOLINE, adrenaline and, reactions of denervated iris to, 268.
—— and electrical potential of frog skin, 557.
—— hydrolysis by frog sartorius muscle, 281.
——, vasopressor actions of, 346.
Action potential artifacts from single nerve fibers, 392.
—— potentials of squid eye, 239.
ADKISON, J. L. See GRAY, ADKISON and ZELLE, 327.
ADLER, H. F. See TEMPLETON and ADLER, 69.
Adrenal cortical hormone substances, assay of, 298.
—— medulla and capacity for muscular activity, 151.
Adrenalin and acetylcholine, reactions of denervated iris to, 268.
—— and sympathin, reactions of partially denervated smooth muscle to, 475.
——, effect of, on carbon dioxide output and respiratory quotient, 197.
—— excitation of smooth muscle, 627.
—— molecule, cardiac effect of groups of, 190.
——, opacities of lens induced by, 543.
——, pressor response to, in traumatic shock, 620.
Adrenalectomy and histaminase in tissues, 539.
——, tissue oxygen consumption in vitro after, 231.
Age, influence of, on ketosis, 332.
ALLEE, W. C. See FINKEL and ALLEE, 665.
Anaphylaxis, typical, in hepatectomized dog, 379.
ANDERSON, H. D., E. J. UNDERWOOD and C. A. ELVEHJEM. Factors affecting the maintenance of cobalt polycythemia in the rat, 373.
Androgen and castration, creatine metabolism after, 503.
Angiotonin, effects of, on renal function, 335.
Anoxic convulsions, hypoglycemic and, 261.
—— effects of high oxygen pressure on smooth muscle, 445.
Arterial, venous and flow components in plethysmography, 177.
Arteries, reactions of, to vasoconstrictor stimuli, 56.
Artery, coronary, differential pressure and blood flow in, 97.
——, ——, normal phasic flow in, 114.
Ascorbic acid, phosphatase and calcium of blood in scurvy, 310.
ASMUSSEN, E., J. W. WILSON and D. B. DILL. Hormonal influences on carbohydrate metabolism during work, 600.
AUMANN, K. W. See YOUMANS, HANEY and AUMANN, 190.

BALL, J. Frequent failure of a single insemination to activate the corpora lutea of the rat sufficiently for implantation of fertilized ova, 471.
BARNES, R. H., D. R. DRURY, P. O. GREELEY and A. N. WICK. Utilization of the ketone bodies in normal animals and in those with ketosis, 144.
BARNES, T. C. Modification of the electrical potential of frog skin by acetylcholine, 557.
BEAN, J. W. and D. F. BOHR. Anoxic effects of high oxygen pressure on smooth muscle, 445.
BENDER, M. B. and E. A. WEINSTEIN. Actions of adrenaline and acetylcholine on the denervated iris of the cat and monkey, 268.

Bennett, W. C. See Little and Bennett, 281.
Berg, M., A. Mayne and W. F. Petersen. Variability of blood pH and its association with meteorological factors, 9.
Berkman, J. See Sherry, Friedman, Paley, Berkman and Ralli, 276.
Black, S. See McKibbin, Black and Elvehjem, 365.
Bladder, decussation of hypothalamic pathways to, 74.
Blood amino acid nitrogen, effects of epinephrine, potassium, pentobarbital and insulin on concentration of, 171.
—— and tissue fluid volumes, effect of climate on, 739.
—— capillaries, perfusion of, 512.
—— cells and serum, glucose distribution between, 89.
—— clotting, rôle of anti-coagulants in, 759.
—— coagulation, action of dicarboxylic acid in, 574.
—— flow components, arterial, venous and, in plethysmography, 177.
———, coronary, factors influencing, 108.
———, differential pressure and, in a coronary artery, 97.
—— in scurvy, ascorbic acid, phosphatase and calcium of, 310.
—— pH, variability of, and meteorological factors, 9.
—— plasma, osmotic relation of aqueous humor and, 340.
—— pressure, differential, and flow in a coronary artery, 97.
———, low, and carotid sinus function, 186.
———. *See* Hypertension.
—— serum magnesium and response of nervous system to, 292.
Bohr, D. F. See Bean and Bohr, 445.
Boyd, E. M. and N. D. Garand. Some factors which influence the inhibition of water loss in albino rats by pituitrin, 403.
Bozler, E. An analysis of the excitatory and inhibitory effects of sympathetic nerve impulses and adrenaline on visceral smooth muscle, 627.
Brain circulation, resistance to arrest of, 588.
—— cortex, oxygen consumption in vitro of, after adrenalectomy, 231.
Breathing, interactions in chemical control of, 155.
——. *See* Respiration.
Brewer, W. See Todhunter and Brewer, 310.
Brody, D. A., J. M. Werle, I. Meschan and J. P. Quigley. Intralumen pressures of the digestive tract, especially the pyloric region, 791.
Brown, R. V. The action of water moccasin venom on the isolated frog heart, 613.
Browne, J. S. L. See Karady, Rose and Browne, 539.

Calcium, ascorbic acid, phosphatase and, of blood in scurvy, 310.
Cannon, W. B. and A. Rosenblueth. Some conditions affecting the late stages of neuromuscular transmission, 219.
——. See Rosenblueth and Cannon, 205.
Capillaries, blood, perfusion of, 512.
Carbohydrate metabolism during work, hormones and, 600.
Carbon dioxide and excitability of vasomotor center in hypoglycemia, 256.
——— output and respiratory quotient after adrenalin, 197.
———, oxygen tension and respiratory response to, 777.
Cardiac factors influencing coronary circulation, 126.
—— effect of groups of the adrenalin molecule, 190.
—— lymph, flow, pressure and composition of, 43.
Carotid sinus function, 186.
Cartland, G. F. See Kuizenga, Nelson and Cartland, 298.
Castration, androgen and, creatine metabolism after, 503.
Cerebrospinal fluid pressure and vitamin A deficiency, 684.

Cervical cord transection, temperature regulation after, 712.
Chloride, body, and body fat, relation between, 608.
——— content, total, of body, 608.
Chyle, hemolytic action of, 723.
Circulation, brain, resistance to arrest of, 588.
———, coronary, cardiac factors influencing, 126.
Clark, G. Temperature regulation in chronic cervical cats, 712.
———. See Wang and Clark, 74.
———. See Wang, Clark, Dey and Ranson, 81.
Climate, effect of, on blood and tissue fluid volumes, 739.
Coagulation of blood, action of dicarboxylic acid in, 574.
Cobalt polycythemia in rat, 373.
Cold and thyrotropic hormone, effects of, on thyroid, 549.
Collins, D. A. and A. S. Hamilton. Pressor responses following short, complete renal ischemia: characteristics, mechanism, specificity for kidney, 784.
Colon, motility of, and transportation force, 69.
Convulsions, hypoglycemic and anoxic, 261.
Corcoran, A. C. and I. H. Page. The effects of angiotonin on renal blood flow and glomerular filtration, 335.
Coronary artery, differential pressure and blood flow in, 97.
———, normal phasic flow in, 114.
——— blood flow, factors influencing, 108.
——— circulation, cardiac factors influencing, 126.
Creatine metabolism after androgen and castration, 503.
Crismon, C. A., R. V. Hanvey and J. M. Luck. The effects of epinephrine, potassium, pentobarbital and insulin on the concentration of amino acid nitrogen in the blood of fasting dogs, 171.

Shock, traumatic, pressor response to adrenalin in, 620.
Skin, frog, acetylcholine and electrical potential of, 557.
Smith, P. K. See Hoff, Smith and Winkler, 292.
Soley, M. H. and N. W. Shock. The rate of respiratory adjustment to postural change, 771.
——. See Shock and Soley, 777.
Spealman, C. R. The action of ions on the frog heart, 729.
Starr, P. and R. Roskelley. A comparison of the effects of cold and thyrotropic hormone on the thyroid gland, 549.
Sugarman, H., L. N. Katz, A. Sanders and K. Jochim. Observations on the genesis of the electrical currents established by injury to the heart, 130.
Sweeney, H. M. Do the carotid sinuses exert a pressor activity when the systemic blood pressure is low, 186.
Sykes, J. F. See Moore and Sykes, 684.
Sympathin, adrenaline and, reactions of partially denervated smooth muscle to, 475.
Sympathetic excitation of smooth muscle, 627.

Temperature, environmental, and cervical lymph flow, 34.

Temperature, regulation in chronic cervical cats, 712.

Templeton, R. D. and H. F. Adler. The relation of transportation force to motility in the colon of the dog, 69.

Testosterone propionate, thymus and, 384.

Tetanic, post-, potentiation and suppression in muscle, 433.

Therman, P. O. The action potentials of the squid eye, 239.

Thymectomy, growth and development after, 671.

Thymus and testosterone propionate, 384.

Thyroid, effects of cold and thyrotropic hormone on, 549.

Tin, effect of traces of, on growth of fish, 665.

Tissue fluid volumes, blood and, effect of climate on, 739.

Tissues, adrenalectomy and histaminase in, 539.

Todhunter, E. N. and W. Brewer. The ascorbic acid, phosphatase and calcium content of the blood of guinea pigs with varying degrees of scurvy, 310.

Traumatic shock, pressor response to adrenalin in, 620.

tum Suden, C. Opacities of the lens induced by adrenalin in the mouse, 543.

Underwood, E. J. See Anderson, Underwood and Elvehjem, 373.

Uterine secretions, chemical composition of, 287.

Uterus, post-partum, histamine-like substance in, 319.

Vagal reflexes in respiration, 675.

Vasoconstriction in renal hypertension abolished by pithing, 1.

Vasoconstrictor stimuli, reactions of arteries to, 56.

Vasomotor action, quantitative criteria of, 63.

—— center, excitability of, in hypoglycemia, 256.

Venom, water moccasin, action of, on frog heart, 613.

Venous and flow components, arterial, in plethysmography, 177.

—— pressure in man, measurement of, 635.

Vitamin A deficiency, cerebrospinal fluid pressure and, 684.

—— —— ——, dark adaptation in, 651.

Vitamin C, renal excretion of, 276.

Wakerlin, G. E. and W. Gaines. The effect of various agents on the blood pressure of renal hypertensive dogs, 568.

Wang, S. C. and G. Clark. Decussation of the sacral autonomic pathways of the bladder from the hypothalamus, 74.

THE AMERICAN JOURNAL OF PHYSIOLOGY

VOLUME 130

BALTIMORE, MD.
1940

CONTENTS

No. 1. JULY, 1940

Vasoconstriction in Renal Hypertension Abolished by Pithing. *W. Dock* 1

Variability of Blood pH and Its Association with Meteorological Factors. *Max Berg, Alvin Mayne and William F. Petersen* 9

Demonstration of the Liberation of Renin Into the Blood Stream from Kidneys of Animals Made Hypertensive by Cellophane Perinephritis. *Irvine H. Page* 22

Difference in the Activating Effect of Normal and Hypertensive Plasma on Intestinal Segments Treated with Renin. *Irvine H. Page* 29

The Effects of Hyperthermia and Hypothermia on Cervical Lymph Flow. *Jane D. McCarrell* 34

The Flow, Pressure, and Composition of Cardiac Lymph. *Cecil K. Drinker, Madeleine Field Warren, Frank W Maurer and Jane D. McCarrell* 43

Reactions of Large and Small Arteries in Man to Vasoconstrictor Stimuli. *Alrick B. Hertzman and John B. Dillon* 56

A Study of Alleged Quantitative Criteria of Vasomotor Action. *Janet T. Dingle, Gerald T. Kent, L. L. Williams and C. J. Wiggers* 63

The Relation of Transportation Force to Motility in the Colon of the Dog. *R. D. Templeton and Harry F. Adler* 69

Decussation of the Sacral Autonomic Pathways of the Bladder from the Hypothalamus. *S. C. Wang and George Clark* 74

Further Study on the Gastro-Intestinal Motility Following Stimulation of the Hypothalamus. *S. C. Wang, George Clark, F. L. Dey and S. W. Ranson* 81

The Distribution of Glucose between Cells and Serum: Further Experiments with High Concentrations of Glucose. *Kalmen A. Klinghoffer* 89

The Relationship between Differential Pressure and Blood Flow in a Coronary Artery. *Harold D. Green and Donald E. Gregg* 97

Effects of Viscosity, Ischemia, Cardiac Output and Aortic Pressure on Coronary Blood Flow Measured under a Constant Perfusion Pressure. *Donald E. Gregg and Harold D. Green* 108

Registration and Interpretation of Normal Phasic Inflow into a Left Coronary Artery by an Improved Differential Manometric Method. *Donald E. Gregg and Harold D. Green* 114

Changes in the Coronary Circulation Following Increased Aortic Pressure, Augmented Cardiac Output, Ischemia and Valve Lesions. *Harold D. Green and Donald E. Gregg* 126

Observations on the Genesis of the Electrical Currents Established by Injury to the Heart. *H. Sugarman, L. N. Katz, A. Sanders and K. Jochim* 130

Utilization of the Ketone Bodies in Normal Animals and in Those with Ketosis. *Richard H. Barnes, D. R. Drury, P. O. Greeley and A. N. Wick* 144

The Capacity for Vigorous Muscular Activity of Normal Rats and of Rats after Removal of the Adrenal Medulla. *Robert E. Harris and Dwight J. Ingle* 151

The Interaction of Central and Peripheral Chemical Control of Breathing. *Robert Gesell, Jack Lapides and Manuel Levin* 155

The Effects of Epinephrine, Potassium, Pentobarbital and Insulin on the Concentration of Amino Acid Nitrogen in the Blood of Fasting Dogs. *Cathrine A. Crismon, Robin V. Harvey and J. Murray Luck* 171

Distinction between Arterial, Venous and Flow Components in Photoelectric Plethysmography in Man. *Alrick B. Hertzman and John B. Dillon* 177
Do the Carotid Sinuses Exert a Pressor Activity when the Systemic Blood Pressure is Low? *H. Morrow Sweeney* 186
Relation of the Groups of the Adrenalin Molecule to Its Cardio-Accelerator Action. *W. B. Youmans, H. F. Haney and K. W. Aumann* 190
The Effect of Adrenalin on Carbon Dioxide Output and Respiratory Quotient: Proportionality with Dose. *Fred R. Griffith, Jr., F. E. Emery and Julia E. Lockwood* 197
Some Features of the Early Stages of Neuromuscular Transmission. *A. Rosenblueth and W. B. Cannon* 205
Some Conditions Affecting the Late Stages of Neuromuscular Transmission. *W. B. Cannon and A. Rosenblueth* 219

No. 2. August, 1940

The Oxygen Consumption In Vitro of Brain Cortex, Kidney, and Skeletal Muscle from Adrenalectomized Rats. *J. M. Crismon and J. Field, 2d* 231
The Action Potentials of the Squid Eye. *P. O. Therman* 239
The Glucose Utilization of Hepatectomized Diabetic Rabbits. *Paul O. Greeley and D. R. Drury* 249
Influence of Carbon Dioxide on the Excitability of the Vasomotor Center in Hypoglycemia. *E. Gellhorn, W. F. Kiely and S. L. Hamilton* 256
Studies on Hypoglycemic and Anoxic Convulsions. *E. Gellhorn, A. Packer and J. Feldman* 261
Actions of Adrenaline and Acetylcholine on the Denervated Iris of the Cat and Monkey. *M. B. Bender and E. A. Weinstein* 268
The Mechanism of the Excretion of Vitamin C by the Dog Kidney. *Sol Sherry, Gerald J. Friedman, Karl Paley, James Berkman and Elaine P. Ralli* 276
Acetylcholine Hydrolysis by the Frog's Sartorius Muscle. *J. Max Little and Wendell C. Bennett* 281
Chemical Composition of Uterine Secretions. *H. E. Shih, Janet Kennedy and Charles Huggins* 287
Effects of Magnesium on the Nervous System in Relation to Its Concentration in Serum. *Hebbel E. Hoff, Paul K. Smith and Alexander W. Winkler* 292
Comparative Parenteral and Oral Assays of Adrenal Cortical Hormone Substances. *M. H. Kuizenga, J. W. Nelson and G. F. Cartland* 298
A Note on the Question of Reflex Activation of Dorsal Root Dilators. *V. P. Dole, Jr. and R. S. Morison* 304
The Ascorbic Acid, Phosphatase and Calcium Content of the Blood of Guinea Pigs with Varying Degrees of Scurvy. *E. N. Todhunter and W. Brewer* 310
A Histamine-Like Substance in the Post-Partum Rabbit Uterus. *Boris Krichesky and William Pollock* 319
The In Vitro Secretion of Acid by the Gastric Mucosa of the Frog. *J. S. Gray, J. L. Adkison and K. Zelle* 327
Influence of Age on Ketosis. *Arne N. Wick and Eaton M. MacKay* 332
The Effects of Angiotonin on Renal Blood Flow and Glomerular Filtration. *A. C. Corcoran and Irvine H. Page* 335
Osmotic Relation Between Aqueous Humor and Blood Plasma. *R. R. Roepke and W. A. Hetherington* 340
Analysis of the Vasopressor and Other "Nicotinic" Actions of Acetylcholine. *Theodore Koppanyi, Charles R. Linegar and Robert P. Herwick* 346
Adaptation to Estrogen Overdosage. An Acquired Hormone Resistance Without Antihormone Formation. *Hans Selye* 358

The Essential Nature of Pantothenic Acid and Another Alkali Labile Factor in the Nutrition of the Dog. *J. M. McKibbin, Simon Black and C. A. Elvehjem* 365
Factors Affecting the Maintenance of Cobalt Polycythemia in the Rat. *H. D. Anderson, E. J. Underwood and C. A. Elvehjem* 373
Typical Anaphylaxis in the Dog in the Absence of the Liver. *E. T. Waters and J. Markowitz* 379
Involution of the Thymus of the Young Albino Rat under Treatment with Testosterone Propionate. *Edward C. Persike, Jr.* 384
Action Potential Artifacts from Single Nerve Fibers. *George Marmont* 392
Some Factors Which Influence the Inhibition of Water Loss in Albino Rats by Pituitrin. *Eldon M. Boyd and N. D. Garand* 403
The Balance of Physical Forces Which Determine the Rate and Direction of Flow of Fluid Through the Intestinal Mucosa. *Herbert S. Wells* 410

No. 3. September, 1940

The Size of the Extracellular Fluid Compartment before and after Massive Infusions. *A. M. Lands, R. A. Cutting and P. S. Larson* 421
Post-Tetanic Potentiation and Suppression in Muscle. *L. Grumbach and D. T. Wilbur* 433
Anoxic Effects of High Oxygen Pressure on Smooth Muscle. *John W. Bean and David F. Bohr* 445
Observations on the Behavior of Diodrast in the Dog. *H. L. White* 454
Observations on Inulin and Diodrast Clearances and on Renal Plasma Flow in Normal and Hypophysectomized Dogs. *H. L. White and Peter Heinbecker* 464
Frequent Failure of a Single Insemination to Activate the Corpora Lutea of the Rat Sufficiently for Implantation of Fertilized Ova. *Josephine Ball* 471
The Reactions of Partially Denervated Smooth Muscle to Adrenaline and Sympathin. *C. T. Klopp* 475
Excitability of the Excised and Circulated Frog's Sciatic Nerve. *Horace Olin Parrack* 481
The Reduction of the Blood Pressure of Hypertensive Dogs by the Administration of Renal Extract. *J. R. Williams, Jr., Arthur Grollman and T. R. Harrison* 496
The Effect of Castration and Androgen Therapy on Creatine and Creatinine Excretion in Monkeys. *Joseph W. Jailer* 503
The Distribution of Blood Perfusates in Capillary Circulation. *Benjamin W. Zweifach* 512
The Prolonged Action of Acidified Solution of Protamine Zinc Insulin. *Melville Sahyun* 521
The Action of Alternating Currents upon the Spike-Potential Magnitude, Conduction Velocity and Polarization of Nerve. *A. Rosenblueth, J. Rebaul and A. M. Grass* 527
Decrease of Histaminase in Tissue by Adrenalectomy and Its Restoration by Cortico-Adrenal Extract. *S. Karady, B. Rose and J. S. L. Browne* 539
Opacities of the Lens Induced by Adrenalin in the Mouse. *Caroline tum Suden* 543
A Comparison of the Effects of Cold and Thyrotropic Hormone on the Thyroid Gland. *Paul Starr and Rigby Roskelley* 549
Modification of the Electrical Potential of Frog Skin by Acetylcholine. *T. Cunliffe Barnes* 557
On the Mechanism of the Depression of the Serum Potassium Level by Epinephrine. *Paul S. Larson* 562
The Effect of Various Agents on the Blood Pressure of Renal Hypertensive Dogs. *G. E. Wakerlin and Walter Gaines* 568

The Mechanism of the Action of Dicarboxylic Acids in Blood Coagulation. *Gustav J. Martin* 574
The Effects of Phlorhizin on Renal Plasma Flow, on Glomerular Filtration and on the Tubular Excretion of Diodrast in the Dog. *H. L. White* 582
The Greater Resistance of Very Young Animals to Arrest of the Brain Circulation. *Herman Kabat* 588
Hormonal Influences on Carbohydrate Metabolism During Work. *E. Asmussen, J. W. Wilson and D. B. Dill* 600
Further Observations on Total Chloride Content: The Relationship Between Body Fat and Body Chloride. *Everett G. Weir* 608

No. 4. October, 1940

The Action of Water Moccasin Venom on the Isolated Frog Heart. *Robert V. Brown* 613
The Pressor Response to Adrenalin in the Course of Traumatic Shock. *Alfred M. Freedman and Herman Kabat* 620
An Analysis of the Excitatory and Inhibitory Effects of Sympathetic Nerve Impulses and Adrenaline on Visceral Smooth Muscle. *Emil Bozler* 627
The Measurement of Venous Pressure in Man Eliminating the Hydrostatic Factor. *J. P. Holt* 635
Reciprocal Innervation in the Small Intestine. *Robert Hodes* 642
Dark Adaptation and Experimental Human Vitamin A Deficiency. *Selig Hecht and Joseph Mandelbaum* 651
The Effect of Traces of Tin on the Rate of Growth of Goldfish. *Asher J. Finkel and W. C. Allee* 665
Growth and Development of Six Generations of Thymectomized Albino Rats. *Albert Segaloff and Warren O. Nelson* 671
Changes in Respiration on Inflation and Deflation of the Chest. *J. K. W. Ferguson* 675
Cerebrospinal Fluid Pressure and Vitamin A Deficiency. *L. A. Moore and J. F. Sykes* 681
The Receptive Fields of Optic Nerve Fibers. *H. K. Hartline* 690
The Effects of Spatial Summation in the Retina on the Excitation of the Fibers of the Optic Nerve. *H. K. Hartline* 700
Temperature Regulation in Chronic Cervical Cats. *George Clark* 712
The Hemolytic Action of Chyle. *L. Willard Freeman and Victor Johnson* 723
The Action of Ions on the Frog Heart. *C. R. Spealman* 729
The Effect of Climate Upon the Volumes of Blood and of Tissue Fluid in Man. *W. H. Forbes, D. B. Dill and F. G. Hall* 739
Relation of Muscle Electrolyte to Alterations in Serum Potassium and to the Toxic Effects of Injected Potassium Chloride. *Herbert C. Miller and Daniel C. Darrow* 747
The Action of Heparin, Serum Albumin (Crystalline), and Salmine on Blood-Clotting Mechanisms (in Vitro). *John H. Ferguson* 759
The Rate of Respiratory Adjustment to Postural Change. *Mayo H. Soley and Nathan W. Shock* 771
Effect of Oxygen Tension of Inspired Air on the Respiratory Response of Normal Subjects to Carbon Dioxide. *Nathan W. Shock and Mayo H. Soley* 777
Pressor Responses Following Short, Complete Renal Ischemia: Characteristics, Mechanism, Specificity for Kidney. *Dean A. Collins and Angie S. Hamilton* 784
Intralumen Pressures of the Digestive Tract, Especially the Pyloric Region. *D. A. Brody, J. M. Werle, I. Meschan and J. P. Quigley* 791
